VW Safari

VW 181

A Volkswagen icon — rugged and authentic for the roads of Cap Ferret and beyond.

Launched in civilian form in 1970, it quickly became a more sheltered alternative to the Méhari or the Moke, while retaining that spirit of open-air freedom. Nearly 100,000 units were produced through 1983. This one-of-a-kind vehicle is the ideal companion for exploring the roads of Cap Ferret and beyond. A true adventure-seeker with vintage charm, the VW Safari promises an authentic escape, set to the legendary sound of its "Aircooled" engine.
